Tampa, FL (October 12, 2015) – MatchWare Inc. announced today that the much-anticipated version 6 of its industry-leading mind mapping software MindView Mac is now available, and has been enhanced to deliver unprecedented levels of productivity, project management and collaboration.

Trusted by leading organizations worldwide, MindView Mac is a powerful, yet easy-to-use solution that lets users visually brainstorm, organize and present their ideas through:

- Multiple interchangeable views, including: Mind Map, Top Down, Left/Right, Outline, Timeline, and Gantt.

- Award-winning integration with MS-Office and MS-Project.

- Several collaboration options, including a unique "Pack & Email" feature for easily and rapidly distributing mind maps, multimedia content and external linked files.

- A library of over 80 professional-grade templates, and a multimedia catalog with more than 1500 high quality graphics, root shapes and map styles.

- A unique "Brainstorming Mode" for capturing inspiration that spontaneously emerges during meetings.

- Task management tools for creating simple task lists or a complete list of interrelated tasks.

- The ability to attach external resources (e.g. documents, pictures, hyperlinks, sounds, videos, animations, etc.).

- A variety of professional map styles to apply different branch shapes, branch colors and other coordinated attributes to maps.

- Multiple print choices, including "fit to page" and other options that are ideal for notoriously hard-to-print documents, such as project timelines and Gantt charts.
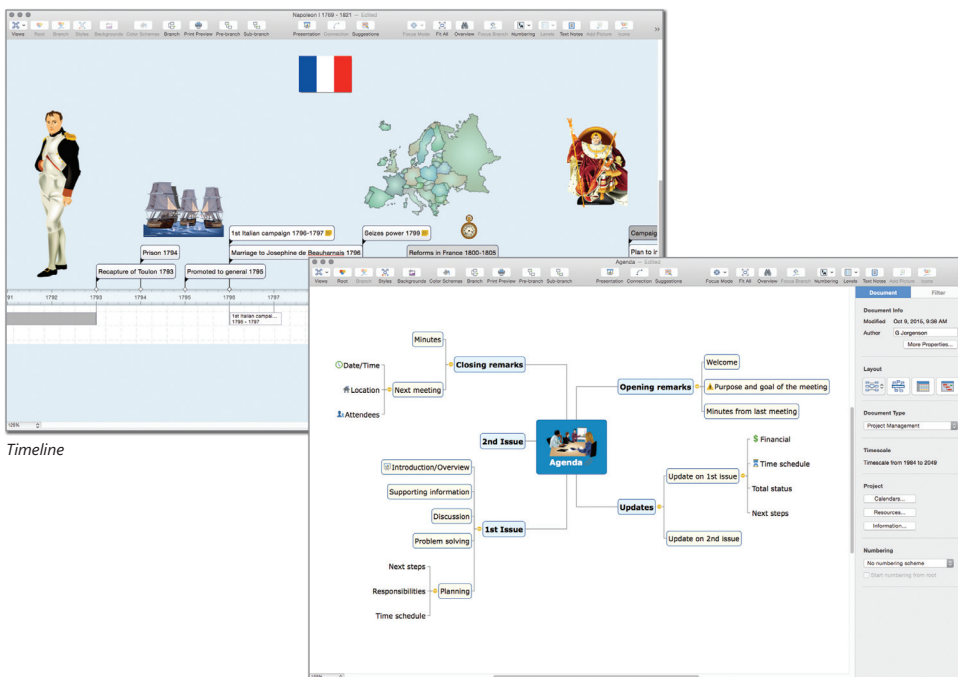

And now in version 6, MindView Mac users can take advantage of several key additions and improvements, including:

- An enhanced "Mac-friendly" user interface that aligns with the latest OS X design guidelines, feel and look.

- An innovative engine that delivers intelligent, in-context predictive suggestions that can be added, edited or deleted as desired.

- Improved integration with MindView 6 PC, MindView Online and MS-Project, respectively.

- An advanced filter for rapidly finding and focusing on a specific set of branches.

MatchWare's MindView Mac 6 is available in multiple license options, including single user, 5-user and 10-user. A complimentary trial version is also available. Learn more at www.matchware.com/en/products/mindview/mindview_mac.htm.

Timeline

Mind map

"MindView is an essential business tool that doesn't just enhance presentations and pitches, but more importantly, it transforms great ideas into practical action, and then ultimately into bottom-line business results. Version 6 takes the benefits and advantages to a whole new level, and further establishes MindView as the industry leader in mind mapping software."

Thomas Henriksen
MindView's Product Manager
